## 12. Assessment of loss/ shortfall in yield :

- a) **Crop Cutting Experiments:** State shall maintain single series of crop cutting experiments, i.e same set of CCEs and yield estimates are used both for crop production estimates and crop insurance.

In instances, where required number of crop cutting experiments could not be conducted due to non-availability of adequate cropped area, the yield estimates for such insurance unit area can be generated by using methods as (i) Clubbing with neighboring/ contiguous units or (ii) adopting yield estimates of next higher units or (iii) adopting the yield of neighboring insurance units with maximum correlation.

- b) **Assessment of Claims :** If actual yield (AY) per hectare of insured crop for insurance unit (calculated on the basis of requisite number of CCEs) in insured season falls short of specified threshold yield, all insured farmers growing that crop in the defined area are deemed to have suffered short fall in yield of similar magnitude. PMFBY seeks to provide coverage against such contingency. Claims shall be calculated as per following formula-

$$\frac{(\text{Threshold Yield} - \text{Actual Yield}) \times \text{Sum Insured}}{\text{Threshold Yield}}$$

Where Threshold Yield for a crop in a notified Insurance Unit is the Average Yield of past seven years (excluding a maximum of two calamity year(s) as notified by State Govt./ UT) multiplied by applicable Indemnity Level for that crop.

The District committee will comprise District Agriculture Officer of Agriculture Department (as a Chairman), Sadar Kanungo of Revenue Department (as a member) and representative of Implementing Agency (as a member) of concerned District. The Joint Committee has already been notified by the Govt. of H.P. vide letter No. Agr-B-F(1)-3/2016 dated 26<sup>th</sup> May, 2016.
